

WATER QUALITY in good health

Main Use	Safe Drinking Water
Davey Product	Microlene Max Green Activated Carbon Cartridge Filter, Reverse Osmosis Unit
Customer	NZHM
Location	Auckland, New Zealand

Davey trusted to provide pure water for health industry

New Zealand Health Manufacturing (NZHM) are a New Zealand Dietary Supplement Manufacturer, specialising in the manufacturing and packaging of softgel, hardshell, tablet and powdered health products. They produce around 20 million soft gel capsules per month for the GO Healthy brand. The soft gel capsules are processed via a strictly enforced Medsafe audited GMP Process which includes testing in independent New Zealand laboratories to the highest internationally recognised standards.

The business has expanded with a new manufacturing plant being established which, by the end of March will be running at full capacity and is set to see production staff numbers increase from 160 to 200.

"We went straight to Davey as what we've experienced with them has been really good, both the business relationship and product quality as well. So we were really happy to put the order in for the Max RO," says JD Zinzuvadiya, Maintenance Engineer for NZHM.

At Davey, we understand no two jobs are the same. That's why we have a team of sales engineers and a specialised production department to tailor the system for your needs.

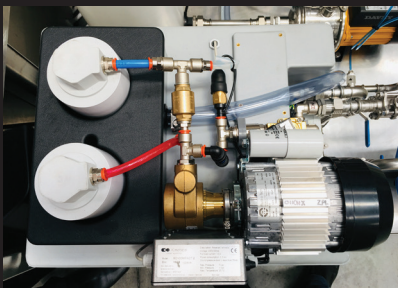

THE DAVEY SOLUTION

A compact turnkey water treatment solution on a stainless-steel skid to achieve British Pharmacopeia quality water using Davey's technologies and equipment such as activated carbon filtration, ion exchange, reverse osmosis and UV disinfection while monitoring the produced water quality online and having an embedded CIP arrangement.

JD says being able to tailor a system to suit not only their water quality requirements but complement the space was vital. "We are always concerned about space in the factory, so the design was really important. We provided the specifications and Davey did the work to come up with a design. It looks really nice, it's very compact and it doesn't kill space for our operations," he says.

Vincent Gruffat, Water Treatment Engineer for Davey NZ says: "This project is a good example of how we do things at Davey and what sets us apart from our competitors. Early engagement with the customer's project team to design a solution that met their needs in terms of produced water quality with minimal footprint on a very tight timeline, innovation in design to select the right equipment and bring value to our customers and strong project management and customer relationships to ensure the project was delivered on time and to specification- overall this project sets a reference for our growing presence in the ultrapure water treatment market," he says.

"This project is a good example of how we do things at Davey and what sets us apart from our competitors."

ABOUT DAVEY

For over 80 years, Davey Water Products has been manufacturing products that help protect and enhance people's lives.

Traditionally servicing the domestic water pumping, water treatment and swimming pool & spa markets, Davey has in recent years expanded its focus and product portfolio to include the commercial pumping, irrigation and commercial pool markets. Backed by specialists in our commercial team, we can also design customised systems to suit project requirements.

Whether you need perfect pressure, healthy drinking water, protection from fire and flood, a clean, relaxing pool or spa or water to run your farm or business, you can depend on Davey.

Davey works to Lean practices, is an ISO 9001 Quality Endorsed Company and been certified to ISO 14001 for our Environmental Management System.
