

Davey's new ChloroMatic Lifeguard allows control and monitoring of your pool system right at your fingertips, with an intuitive app on your smart phone or tablet.

With different modes available on the app and locally at the unit, different pool conditions can be managed with ease:

- When Lifeguard is in **Spa Mode** and your ORP probe is not connected, Lifeguard will reduce the output of the salt chlorinator by 80%.
- When in **Boost Mode** it will run with the salt chlorinator at 100% output for 24 hours. Boost Mode is for when you need to quickly increase the chlorine in your pool.
- **Cover Mode** lets Lifeguard know your pool cover is on. If you have connected an automatic cover, Lifeguard will automatically detect it. When Lifeguard is in Cover Mode, and you have no ORP probe connected, it will reduce the output of the salt chlorinator by 80%.
- When Lifeguard is in Winter Mode, and your ORP probe is not connected, it will reduce the output of the salt chlorinator to 85%.

The Davey Lifeguard includes pH monitoring and acid dosing, ORP control, and temperature and salt measurements, for effortless pool balancing. The user-friendly app gives you full control over your pool system to view and modify the schedules, modes and adjust set points as required, you will receive notifications and alerts when maintenance is required.

NEW

DAVEY ChloroMatic Lifeguard™

Davey's new ChloroMatic Lifeguard is a complete pool and chemistry controller that offers simple, automated pool chemistry control and monitoring, is completely plug and play and is easy to install and program.

You can expect consistently clean, clear and hygienic pool water thanks to the Davey ChloroMatic Lifeguard, with acid dosing, chlorination and even pool temperature, which can all be scheduled through the app. Automated testing and dosing, along with state-of-the-art remote control monitoring, means no more surprises when you're ready to swim.

Along with an intuitive, easy-to-use fully digital display, standard features include:

- WiFi enabled with fully integrated app (remote control can be deactivated)
- pH sensor and acid dosing, ORP control, temperature and salt measurement for effortless pool balancing
- ORP control to prevent over chlorination when pool cover is used
- Next generation high performance reverse polarity cell with integrated safety flow switch
- Low salt cut off to protect the cell
- Boost Mode for additional chlorination during periods of heavy bather loads
- Comprehensive multilingual user-friendly LCD interface
- Operating Salt Level: 3,000–6,000ppm
- Low salt options offer: 1,500-6,000ppm

Available as a bundle or simple upgrade from your existing Davey ChloroMatic Nipper system.
